Retailer: Waddington Educational Resources Pty Ltd, 11 Walsh Ave STRATHALBYN SA 5255 Ph: (08) 85368000 Email: wadd@wadd.com.au Website: wadd.com.au

Identification

Product Name: Clear-Up

Manufacturer's Codes: CU100 and CU5L

Pack Sizes (retail): 100g sachets and 5L bottles, with date of manufacture 2019 onwards

Use

Major Recommended Uses: Cover/mix with, and aid in the removal of, vomit/spills, dirt, stains and odour. Absorbs liquids. Neutralises acid and unpleasant odours. Deodorises and cleans by capturing debris, dirt, oils, grease and helps prevent stains, mould etc via its built-in detergent and sanitary agent.

Major Recommended Method of Application: Shake then sprinkle over spill, such as vomit. Use enough to absorb liquid. Wipe up with a damp sponge and/or sweep/vacuum. Repeat for stubborn marks/spills. When fully dry, sweep/vacuum residue away. Safely dispose of waste / clean vacuum filter. Use under competent adult supervision.

Physical Description

Appearance: White granules.

Properties

Not flammable.

Non-soluble component can be returned to earth to biodegrade over time.

Slight corrosiveness.

Slight oxidising properties.

Do not mix with acids.

Contains lemon extract.

Ingredients

Name	Proportion (volume)	Synonyms
Volcanic rock earth (special)	Less than 90%	Perlite (special)
TLV (threshold limit values) categorise this naturally occurring 100% Australian mined and specially manufactured volcanic material to be non-hazardous, with rhyolitic aluminium siliceous composition without a crystalline structure (zero or within acceptable trace element limit), considered to have only 'nuisance dust' properties according to criteria of Work Safe Australia.		
Sodium carbonate (special)	Less than 20%	Washing soda
Sodium dichloroisocyanurate	Less than 1.0%	Chlorine
Lemon extract	Less than 1.0%	Citrus

Health Effects

Non-toxic. No acute or chronic health effects. May cause irritation to eyes due to abrasiveness of product. Mild irritation to skin. Excessive inhalation over a prolonged period may cause irritation to the respiratory tract. As stated on the packaging, use gloves for sensitive skin and avoid breathing in any dust.

First Aid

If on skin or in eyes, wash thoroughly with water. If swallowed, and person is conscious/alert, do not induce vomiting, give 2 - 4 cups water. Seek medical attention for any irritation caused.

Precautions for Use and Personal Protection

Use methods of dispensing which avoid creating unnecessary dust. If using large quantities, for extended periods, wear a mask suitable for dust, gloves, general use protective eye wear and large protective apron.

Storage and Transport

Store in a cool, dry place out of direct sunlight and in original packaging or other clean airtight container.

Spills and Disposal

Sweep up into a bag and dispose in regular waste bin. Vacuum last traces.

Fire/Explosion Hazard

No fire or explosive hazards. Is not combustible and will not burn.

Reactivity: Keep away from acids due to chlorine content.
